Education

Ramrao Adik Institute of Technology, D. Y. Patil Deemed to be University — **July 2023 – Present**
B.Tech *in Computer Engineering,* ***Major:*** *Data Science —* ***CGPA:*** *9.00/10 —* ***Full-time*** — *Navi Mumbai, India*

Jaipuriar School — **March 2021 – July 2023**
12th Grade *— 70.8% —* ***Full-time*** — *Navi Mumbai, India*

Avalon Heights International School — **May 2015 – April 2021**
10th Grade *— 91% —* ***Full-time*** — *Navi Mumbai, India*

Experience

ReasonateAI Pvt. Ltd. — **August 2026 – October 2026**
AI Engineer Intern — *Remote*

- Designed and built modern, responsive **UI** for an AI Vibecoding Platform, improving usability for **25K+ users**.
- Connected the front end to remote GPU-hosted LLM inference via secure SSH tunnels; debugged **API integration** issues.

ServiceIO Consultancy Services — **May 2026 – July 2026**
Trainee Intern — *Thane, India*

- Built a bidirectional **Jira–ServiceNow integration** using Scripted REST APIs and webhooks for automated incident synchronization, data mapping, and correlation tracking.

Projects

TradeFlow – Fixed-Income Electronic Trading Simulator | *FastAPI, React, PostgreSQL, Redis, WebSockets, Docker* **2026**

- Simulated **RFQ quote-competition** workflows for fixed-income market-making within a 15-second response window under live liquidity and yield constraints, tracking real-time execution KPIs and counterparty settlement risk through interactive dashboards.

AI Financial Research Assistant | *Python, SQL, FastAPI, PostgreSQL, React, Plotly, Pandas, LangChain, FAISS* **2026**

- Built ETL pipelines using **yFinance** and **SEC EDGAR APIs** to load market data into PostgreSQL, powering dashboards for financial ratios, SMA, RSI, and MACD with AI-powered investment summaries using **RAG**.

EmpathI – AI-Powered Crowdfunding Platform | *Python, FastAPI, React, PostgreSQL, LightGBM, XGBoost, Docker* **2026**

- Engineered validation and reporting pipelines for **500+ campaigns**, achieving **90%+ fraud detection** using LightGBM and XGBoost; built for the **Samsung Innovation Campus 2026** hackathon.

Messier Deep Sky Navigator | *JavaScript, Python, Leaflet.js, OpenSeadragon* **2025**

- Processed **10,000+ astronomical image tiles** into a coordinate-mapped interactive sky catalog with deep-zoom visualization (NASA Space Apps Challenge 2025).

Technical Skills & Certifications

Languages: SQL, Java, Python
Databases: PostgreSQL, MySQL, SQLite, MongoDB, Firebase Firestore
Frameworks: FastAPI, React, TensorFlow
Libraries: Pandas, NumPy, Scikit-learn, LangChain, FAISS
Visualization: Plotly, Tableau, Power BI, Excel
DevOps & Tools: Git, GitHub, Docker, VS Code
Software Engineering: SDLC, Agile Development, Object-Oriented Programming

McKinsey.org Forward Program – Dec. 2025
Aspire Leaders Program – Dec. 2025
Deloitte Australia Data Analytics – Jul. 2025
Cisco Data Analytics Essentials – Jun. 2026

Leadership

RAIT ACM SIGAI Student Chapter — **September 2025 – July 2026**
Webmaster — *Navi Mumbai, India*

- Tech Lead for national-level hackathons with **2,000+ participants**; maintained the chapter website.
- Served as **Editor-in-Chief of Synara 2026**, coordinating technical content and publication.

Achievements

Adobe University Hackathon 2026 — **August 2026**
Online Assessment – Qualified — *India*

- Passed an assessment featuring 15 multiple-choice questions and 2 coding challenges in a one-hour evaluation.

Flipkart Gridlock Hackathon 2.0 — **May 2026**
Round 2 – Prototype Phase — *India*

- Advanced to the prototype phase for innovation and functional solution delivery.

NASA Space Apps Challenge 2025 — **October 2025**
Shortlisted Local Finalist – Global Nominee — *Amritsar, India*

- Built the Messier Deep Sky Navigator and was shortlisted as a local finalist in the global NASA hackathon.

Interests

Sketching, biking, Formula 1, astronomy & astrophotography, business & finance
